

Unit 1: Polynomial and Rational Functions

Name: _____ Date: _____

Period: _____

Learning Targets — I Can...

1. I can describe how $g(x) = af(x + h) + k$ transforms the graph of f using vertical and horizontal translations and vertical and horizontal dilations (including reflections).
2. I can determine the domain and range of a transformed function from the domain and range of the parent function.

What's in This Packet

#	Component	Description	Score
1	Warm-Up	Spiral review: function notation, domain/range, reading a graph	_____
2	Guided Notes	Four transformation types with tables of values; summary chart	_____
3	Group Activity	Function Makeover Studio — build, match, and reverse transformations	_____
4	Exit Ticket	Identify a transformation, complete a table, state a domain	_____
5	Homework	Practice all four transformation types, combined, and domain/range	_____
Total			_____
