Spiral Review

1. Complete the square to rewrite $x^2 - 6x$ in the form $(x - h)^2 + c$. What is h , and what constant c must you add?

2. A circle is centered at $(2, -3)$ with radius 5. Write its equation in standard form.

3. Consider the equation $\frac{(x - 1)^2}{9} + \frac{(y + 2)^2}{4} = 1$.

- (a) What is the center of this ellipse? _____
- (b) What is the horizontal radius a ? _____
- (c) What is the vertical radius b ? _____
