

Unit 1: Polynomial and Rational Functions

Name: _____ Date: _____

Period: _____

Learning Targets — I Can...

1. I can identify the appropriate function type (linear, quadratic, cubic, polynomial, piecewise) for a given data set or contextual scenario by analyzing rates of change.
2. I can articulate the assumptions and domain/range restrictions embedded in a function model.

What's in This Packet

#	Component	Description	Score
1	Warm-Up	Spiral review: first and second differences, constant vs. changing rates	_____
2	Guided Notes	Difference-table decision tree; shape/context clues; assumption templates	_____
3	Group Activity	Data Dispatch Agency — select models and state assumptions for scenarios	_____
4	Exit Ticket	Difference table, model classification, and assumption statement	_____
5	Homework	Independent practice: differences, matching, assumption articulation	_____
Total			_____
