

Name: _____ Date: _____

Period: _____

Spiral Review — Key

1. The graph below represents one complete period of a sinusoidal function g .

- (a) What is the amplitude of g ? **3**
 (b) What is the period of g ? **2π**
 (c) What is the midline (vertical shift) of g ? **$y = 0$**

2. The table below gives values of a periodic function over one period.

t	0	3	6	9	12
$h(t)$	2	14	2	-10	2

- (a) What is the maximum value? **14** What is the minimum value? **-10**
 (b) Compute the amplitude: $A = \frac{\max - \min}{2} = \frac{14 - (-10)}{2} = \frac{24}{2} = 12$
 (c) Compute the midline: $D = \frac{\max + \min}{2} = \frac{14 + (-10)}{2} = \frac{4}{2} = 2$
