Period: _____

Spiral Review — Key

1. Use the unit circle to fill in the table.

θ	$\sin \theta$	$\cos \theta$
0	0	1
$\frac{\pi}{4}$	$\frac{\sqrt{2}}{2}$	$\frac{\sqrt{2}}{2}$
$\frac{\pi}{2}$	1	0

2. Two points are plotted. Compute the slope of the line through them.

$$\text{Slope} = \frac{\text{rise}}{\text{run}} = \frac{3}{2} = \frac{3}{2} = 1.5$$

3. The function
- $h(x) = \frac{1}{x-2}$
- is undefined at
- $x = 2$
- .

- (a) State the vertical asymptote of h : $x = 2$
- (b) Complete the table to see what happens as $x \rightarrow 2^+$.

x	$h(x)$
3	1
2.5	2
2.1	10

- (c) As $x \rightarrow 2^+$, the values of $h(x)$ **increase without bound (approach $+\infty$)**
