

Name: _____ Date: _____

Period: _____

Warm-Up: Prerequisite Review

1. Evaluate each trigonometric expression. Write your answer as an exact value.

(a) $\sin\left(\frac{\pi}{6}\right) =$ _____ (b) $\cos\left(\frac{\pi}{3}\right) =$ _____ (c) $\tan\left(\frac{\pi}{4}\right) =$ _____ (d) $\cos\left(\frac{5\pi}{6}\right) =$ _____

2. The table below shows some values of a function f .

x	0	$\frac{\pi}{6}$	$\frac{\pi}{2}$	$\frac{5\pi}{6}$	π
$f(x)$	0	$\frac{1}{2}$	1	$\frac{1}{2}$	0

(a) Is f a one-to-one function based on this table? Circle one: **Yes** **No**

(b) Explain your answer using the definition of a one-to-one function.

3. State the domain and range of $f(x) = \sin x$ (unrestricted).

Domain: _____ Range: _____

4. For a function to have an inverse, it must be _____. What graphical test checks this condition?
