

Unit 1: Polynomial and Rational Functions

Name: _____ Date: _____

Period: _____

Learning Targets — I Can...

1. I can determine whether a rational function has a hole or a vertical asymptote at a shared zero of the numerator and denominator by comparing multiplicities.
2. I can find the coordinates of a hole by canceling common factors and evaluating the simplified function at the shared zero, and express the result using limit notation.

What's in This Packet

#	Component	Description	Score
1	Warm-Up	Spiral review: vertical asymptotes and factoring	_____
2	Group Activity	Missing Data Points — classifying holes and VAs	_____
3	Exit Ticket	Identify holes and write limit notation independently	_____
4	Homework	Practice with holes, VAs, and limit notation	_____
Total			_____
