

Name: _____ Date: _____

Period: _____

Exit Ticket: Inverse Trigonometric Functions

1. Evaluate each expression. Give the exact answer in radians.

(a) $\arccos\left(-\frac{\sqrt{3}}{2}\right) =$ _____

(b) $\arctan(-\sqrt{3}) =$ _____

2. Explain in 1–2 complete sentences why the domain of the sine function must be *restricted* in order to define the arcsine function.
