

Unit 4: Functions Involving Parameters, Vectors, and Matrices

Name: _____ Date: _____

Period: _____

Learning Targets — I Can...

1. I can identify the horizontal extrema of a parametric motion curve by finding the maximum and minimum values of $x(t)$, and the vertical extrema by finding the maximum and minimum values of $y(t)$.
2. I can determine the x -intercepts and y -intercepts of a parametric curve from the zeros of $y(t)$ and $x(t)$, respectively.
3. I can describe a particle's range of motion by stating the maximum and minimum values of each component function over its domain.

What's in This Packet

#	Component	Description	Score
1	Warm-Up	Spiral Review: Quadratic Extrema & Component Evaluation	_____
2	Group Activity	Remote-Control Car: Extrema and Intercepts	_____
3	Exit Ticket	Planar Motion Check	_____
4	Homework	Parametric Planar Motion Practice	_____
Total			_____
