

Unit 4: Functions Involving Parameters, Vectors, and Matrices

Name: _____ Date: _____

Period: _____

Learning Targets — I Can...

1. I can graph an equation in two variables by finding solutions and identifying the explicit function pieces it describes.
2. I can determine whether two variables in an implicit equation co-vary positively or negatively by examining the sign of the ratio of their changes.
3. I can identify where the rate of change is zero or undefined and interpret this geometrically (horizontal or vertical behavior).

What's in This Packet

#	Component	Description	Score
1	Warm-Up	Prerequisite skills: solving for y , reading a ratio	_____
2	Group Activity	Graphing implicit equations and analyzing co-variation	_____
3	Exit Ticket	Find y -values on an ellipse; determine co-variation sign	_____
4	Homework	Practice: implicit functions, co-variation, AP MC	_____
Total			_____
