

Name: _____ Date: _____

Period: _____

Warm-Up

1. Solve $x^2 + y^2 = 100$ for y . How many solutions for y are there when $x = 6$?

 $y =$ _____

Number of solutions: _____

2. The table below shows (x, y) pairs on a curve.

x	y
1	3
2	5
4	9

Compute $\Delta y / \Delta x$ from $x = 1$ to $x = 2$: _____

Is this ratio positive or negative? _____

What does the sign tell you about how y changes as x increases? _____

3. The equation is $y^2 = x + 4$.

(a) For $x = 0$, what are the y -values? _____(b) For $x = 5$, what are the y -values? _____
